PROFESSIONAL SUMMARY

Junior Backend / Fullstack Developer with strong foundations in backend systems, REST APIs, databases, and modern software engineering workflows. Experienced in building fullstack and backend applications using Node.js, Next.js, PostgreSQL, Prisma ORM, Python, C#, Java, and SQL, with exposure to MVC architecture, authentication, CI/CD pipelines, and DevSecOps practices. Developed production-style academic and personal projects involving CRUD APIs, database-backed systems, analytics dashboards, secure authentication workflows, and containerized development environments. Hands-on exposure to Docker, Jenkins CI/CD pipelines, SonarQube static analysis, Trivy vulnerability scanning, and Kubernetes fundamentals. Previously worked in IT support and systems-related roles, developing strong troubleshooting, operational, and system-level problem-solving skills now applied to backend software engineering and application development.

CORE SOFTWARE ENGINEERING SKILLS

- Backend and server-side application development (Node.js, REST APIs)
- Database-driven application design and CRUD operations
- Frontend development using HTML, CSS, and JavaScript
- Object-Oriented Programming (OOP) fundamentals
- Input validation, debugging, and error handling
- Unit testing and application workflow verification
- Automation and scripting using Python
- Version control using Git
- System-level root-cause analysis and troubleshooting

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, C#, Java, SQL, HTML, CSS

Frameworks, Backend & Concepts: Node.js, Express.js, Next.js, REST APIs, CRUD, MVC Architecture, Authentication, Validation, Secure API Design, SDLC, Agile Fundamentals

Databases & ORM, DevOps & Security: PostgreSQL, SQL Server, MySQL, Prisma ORM, **Docker, Jenkins CI/CD, SonarQube, Trivy, OWASP Dependency-Check, Kubernetes Fundamentals**

Developer Tools: Git, GitHub, Postman, VS Code, Cursor, Windsurf, PyCharm, Jupyter Notebook

Operating Systems: Windows, macOS, Linux

DEVSECOPS & CI/CD

- Built secure CI/CD workflows using Jenkins pipelines
- Performed container and dependency vulnerability scanning using Trivy and OWASP Dependency-Check
- Integrated SonarQube static analysis into automated pipeline workflows
- Worked with Docker containerization and Kubernetes deployment fundamentals
- Applied DevSecOps concepts including security scanning, automation, and pipeline-based validation

PROJECTS

FinTrack – Personal Finance Tracking System

- Developed a fullstack finance tracking application using Next.js, Prisma ORM, and PostgreSQL
- Implemented authentication, protected APIs, analytics dashboards, and database-driven workflows
- Designed backend persistence layers and secure application architecture
- Built data visualisation dashboards to present financial trends and user spending insights

DevSecOps CI/CD Pipeline

- Built secure CI/CD pipelines using Jenkins and Docker
- Integrated SonarQube static analysis and Trivy vulnerability scanning
- Applied OWASP Dependency-Check and security validation practices
- Gained exposure to Kubernetes deployment concepts

Car Rental System (C# / .NET 8)

- Developed a console-based car rental management application using C# and .NET 8
- Applied object-oriented programming principles including class design and business logic implementation
- Implemented customer, vehicle, and rental transaction management workflows

Render-ready CRUD Server

- Developed RESTful APIs using Node.js and Express
- Implemented CRUD functionality, validation, and structured request handling
- Designed backend architecture suitable for deployment environments

EduConnect Backend (Academic Project)

- Designed REST APIs and database-backed services using MVC architecture
- Integrated PostgreSQL database functionality and backend workflows
- Applied maintainable code structure and validation practices

PROFESSIONAL EXPERIENCE

U3 Infotech Pte Ltd

System Engineer (Application & Software Support) | Mar 2024 – Jun 2025

- Supported enterprise applications and backend operational workflows

- Assisted with application deployment, configuration, troubleshooting, and incident resolution
- Automated operational tasks using scripts and system utilities
- Collaborated with teams to ensure system reliability and service continuity

JK Tech Pte Ltd

IT Engineer (Systems & Applications) | Jul 2022 – Jun 2023

- Supported web-based and desktop applications
- Automated workflows using scripts
- Troubleshoot application and data-related issues

Micro 2000 Services / Technologies Pte Ltd

Technical Support Engineer | Apr 2022 – Jun 2022

- Installed, tested, and updated software applications
- Assisted with data migration and system provisioning

SLA

Tech Refresh Engineer | Dec 2021 – Mar 2022

- Installed operating systems and application software
- Diagnosed and resolved system and application issues

EDUCATION

Ngee Ann Polytechnic

Diploma in Full-Stack Development

Singapore Polytechnic

Computer Engineering – Job Specialisation Certificate

CERTIFICATIONS

- BCG RISE – Business & Data Analytics (Distinction)
- Analytics, Cyber Security, AI & Blockchain
- Agile & Software Development modules
